

Lourette Swanepoel

Registered Professional Planner

Stantec Consulting Ltd.

Lourette is a Registered Professional Planner with Stantec Consulting Ltd. in Vancouver. She is also an accredited Envision® Sustainability Professional with a Professional Certificate in Asset Management Planning, helping communities and public agencies to address their strategic infrastructure and community sustainability challenges.

Lourette has a passion for sustainability management and better informing the decision-making and design process through a sustainability lens. In her work, she blends the professions of planning and engineering – appreciating the strategic interrelationship between community planning, asset management and infrastructure design. She co-authored the National InfraGuide Best Practice on Infrastructure and Land Use Planning and has been the recipient of numerous awards for her work over the years, including Team Canada’s international award-winning citiesPLUS project with the Honourable Mike Harcourt and a 2016 Canadian Institute of Planners Award for Planning Excellence for her work on the Community Lifecycle Infrastructure Costing (CLIC) Tool.

Lourette managed the development of the Port of Vancouver’s Green Infrastructure Guidelines for design and construction, and the Envision® certification for the Port’s collaborative Low Level Road project, which was the first North American transportation infrastructure project to receive Envision® Platinum certification. She was sustainability lead, overseeing the Envision strategy on the Roberts Bank Terminal 2 Owner’s Engineer team – the proposed project is a new three-berth marine terminal in Delta, BC. Lourette is an approved Institute for Sustainable Infrastructure trainer and a member of the Envision® Public Information Committee.
