Experience and Expertise

Janice Noronha is a Partner within the Risk Assurance Services of PwC Montreal, specializing in Sustainability and Climate Change Practice. She has more than twenty years of experience in the review, development and implementation of sustainability strategies, programs and reporting frameworks. She has specialized experience in the areas of integrated management systems, including health, safety, security quality and environment. She is also an expert in industrial ecology, regulatory guidance and internal and third-party assurance of sustainability data.

Her experience within the sustainability field covers a diverse range of industrial and institutional settings in Canada and the US, including the transportation and logistics, retail, aerospace, financial services and the metals and mining sectors. Within the transportation and logistics sector, she has extensive experience developing sustainability strategies that align with international standards and integrate industry best practices to deliver value based strategies that create economic, social and environmental benefits within society.

She holds a Masters of Management in Environmental Studies (MES) from Dalhousie University and has a postgraduate degree in Public Administration.
